# A simple idea behind our success: build what was missing.

Biomedica.kiwi is part of the Biomedica su Misura Group, a leading company in customized orthopedics products. Our deep-rooted reality in Italy with direct locations from Rome to Milan manages more than 3,000 patients each year offering tailored and customized solutions. The experience gained over the years has led us not to be satisfied with the products available on the market and has encouraged us to design and create ever more functional and personalized solutions in order to achieve the maximum efficiency that can be achieved during the rehabilitation process. All Biomedica.kiwi products have been designed and tested directly in the rehabilitation's field.

# Choose the right size

How take the measurement of the feet with AFO to choose the correct footwear

Follow these easy steps to understand which size is suitable to you or your children.

## STEP 1: Take the measurements with 5 easy measurements

A: total length of the foot

B: Circumference at the widest point of the foot 1st and 5th metatarsal

B1: Width of the foot at the same point of measurement B (1st and 5th metatarsal)

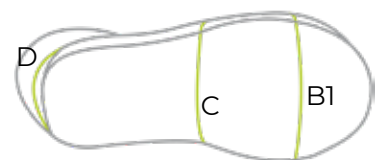

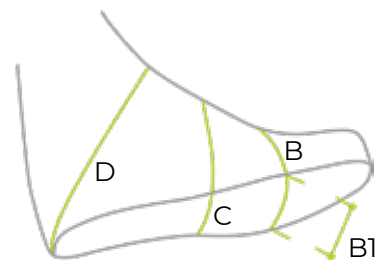

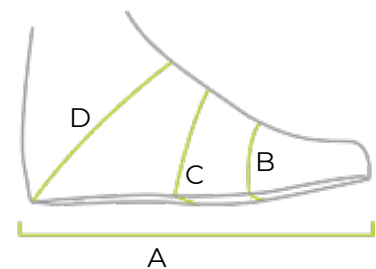

C: Instep circumference

D: Circumference taking as reference points the instep and the foot (past)

NB: the measures C, D will always refer to the total circumference of the foot.

## STEP 2: Refer to the table below
